Background
UiPath Skillathon 2022
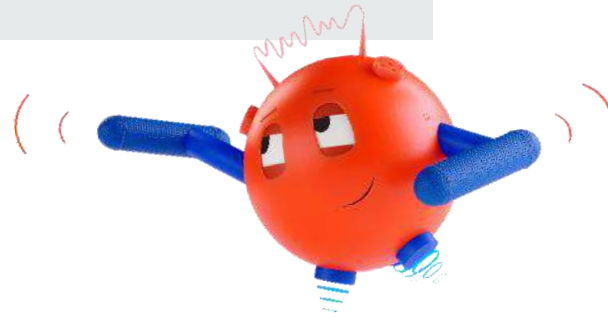

What is Robotic Process Automation (RPA)

What is robotic process automation?

Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate humans actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. But software robots can do it faster and more consistently than people, without the need to get up and stretch or take a coffee break.

What are the business benefits of RPA?

Robotic process automation streamlines workflows, which makes organizations more profitable, flexible, and responsive. It also increases employee satisfaction, engagement, and productivity by removing mundane tasks from their workdays.

RPA is noninvasive and can be rapidly implemented to accelerate digital transformation. And it's ideal for automating workflows that involve legacy systems that lack APIs, virtual desktop infrastructures (VDIs), or database access.

Here's an example of a software robot hard at work reading and evaluating resumes

What is a UiPath Software Robot?

Watch video - https://youtu.be/3R67RGjZoOM
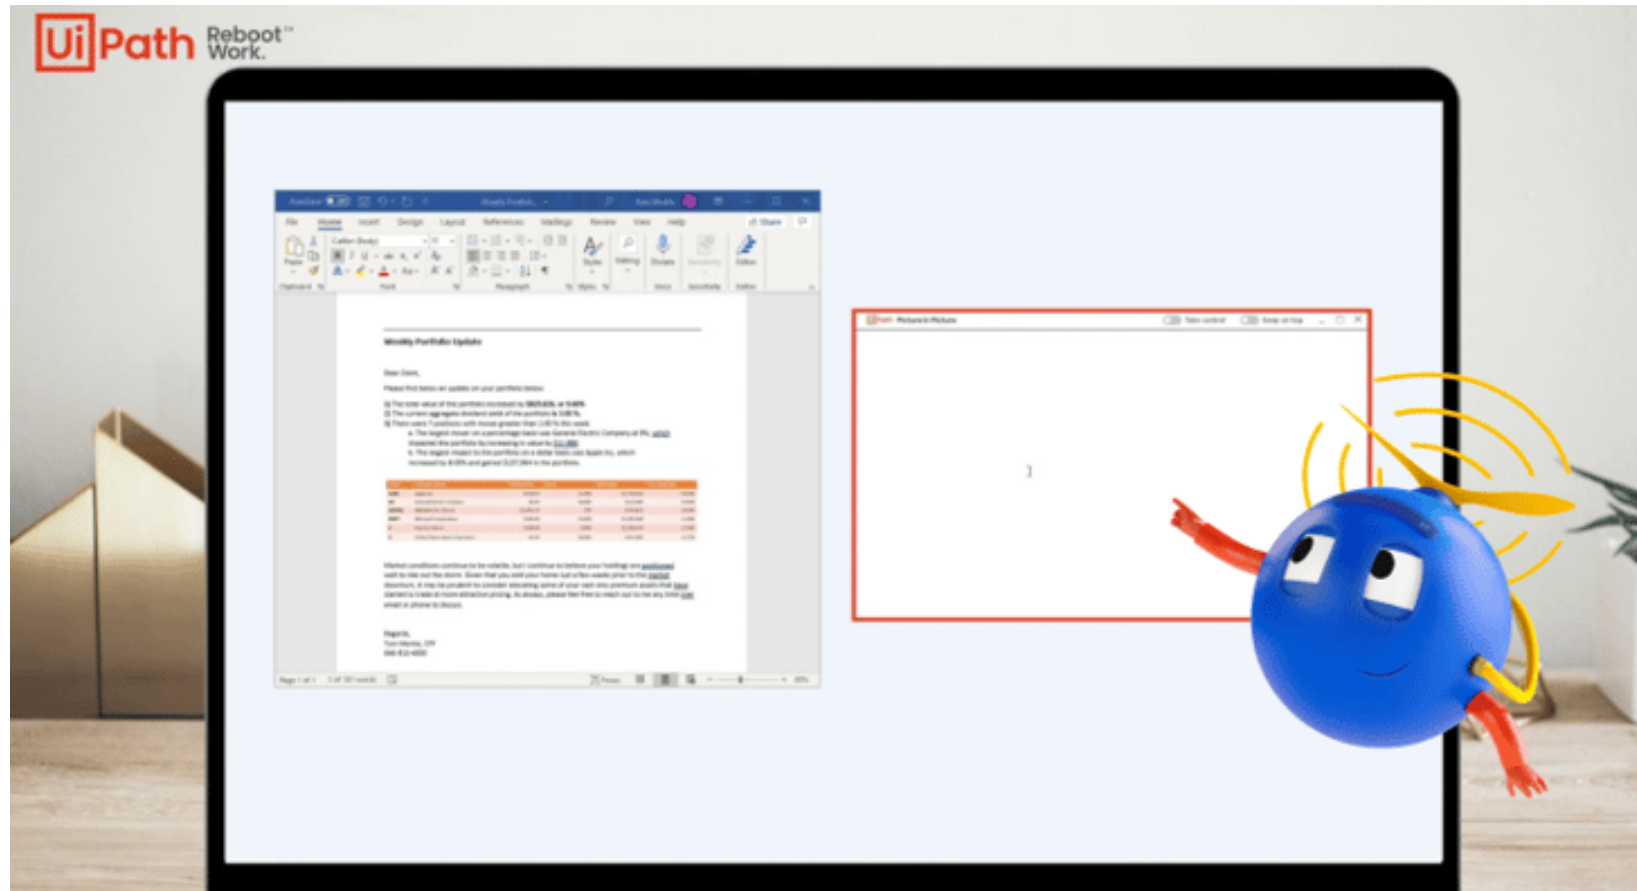

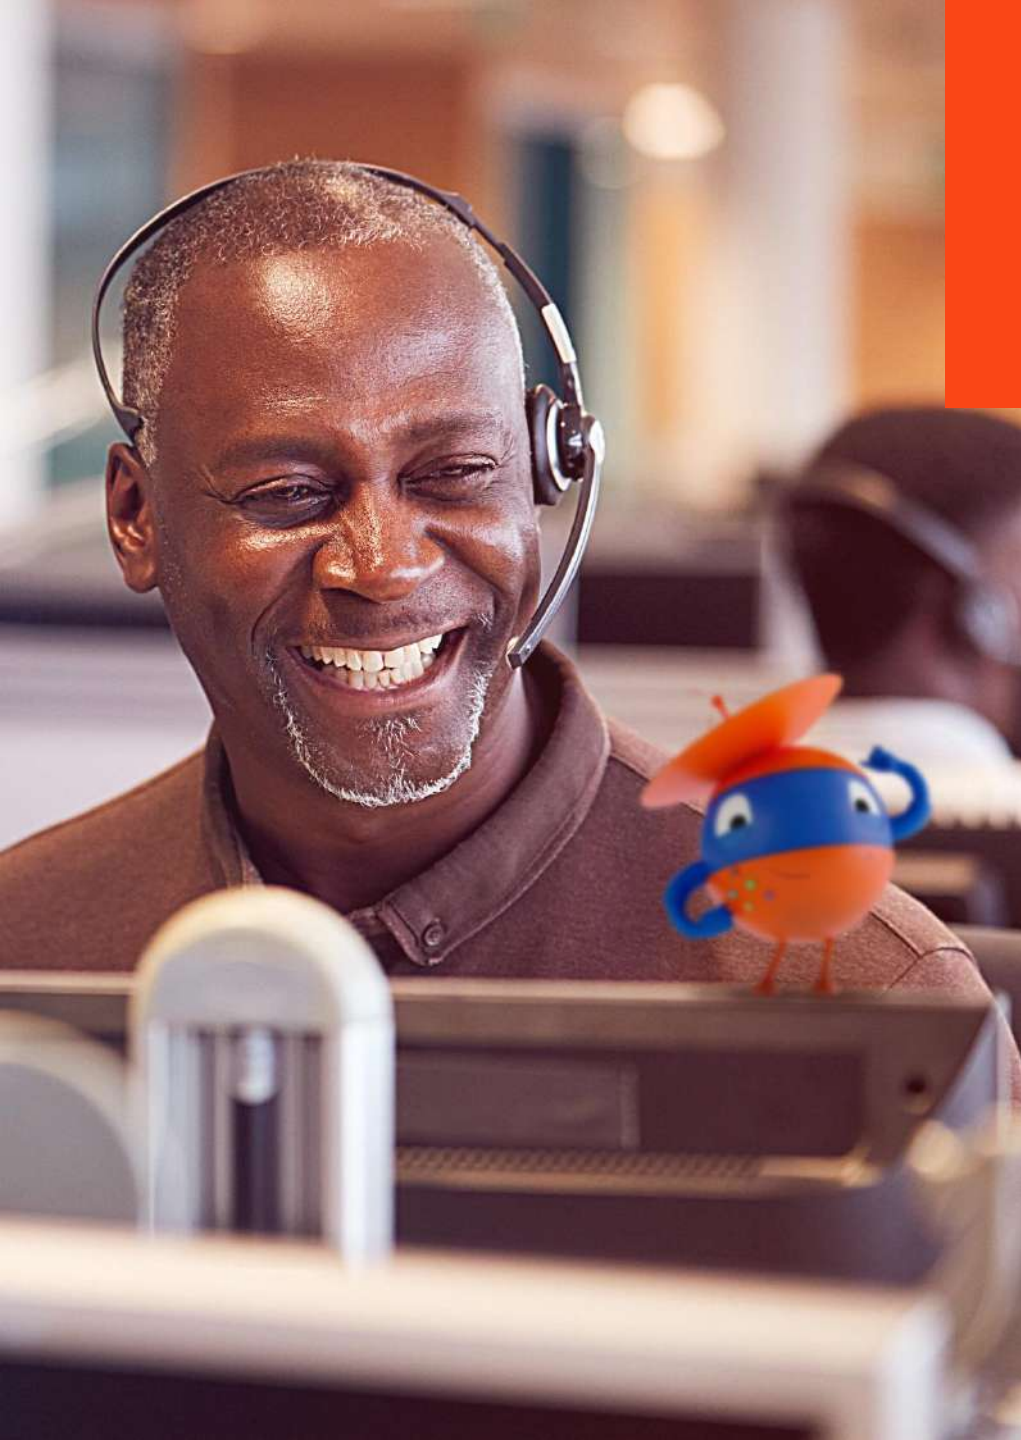

Imagine if every employee could work with a digital assistant

Ui Path Reboot Work.™

Give your people the freedom to work:

Faster

More creatively & collaboratively

With better accuracy

On higher value tasks

By working with robots, employees save time – unlocking capacity at scale

Estimated time savings by providing a digital assistant to **one employee**

Estimated time savings by providing a digital assistant to **15k employees**

240 hours per year
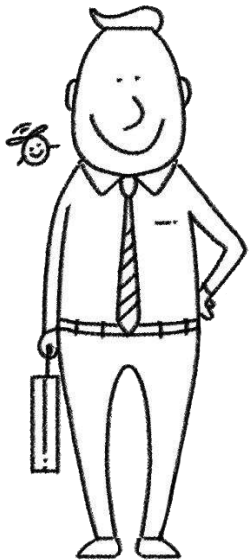

3.6M+ hours per year

1 hour per day
20 hours per month

cit·i·zen de·vel·op·er
/ˈsidizən,ˈsidisən/ /dəˈveləpər/

A non-technical user that creates simple automations for themselves and their departments.

UiPath Reboot™ Work.
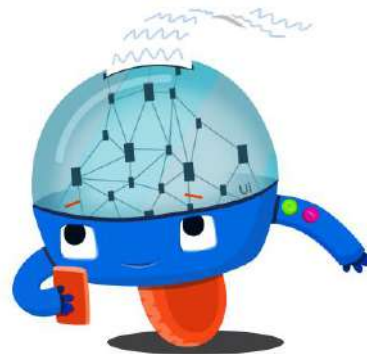

" Future citizen-developed applications will leverage IT investments below the surface, allowing IT to focus on deeper architectural concerns, while end users focus on wiring together services into business process and workflows. "

Eric Knipp, **Senior Research Analyst, Gartner**

Profile of a UiPath Citizen Developer

Who

Tech-savvy employees developing automation for themselves and their departments

Skills needed

- Business user eager to automate manual and tedious tasks, enjoys learning new technology

- Have essential analytical thinking and a basic understanding of formulas

- Can break a process down into smaller logical units

- Can draw a basic process diagram

- Proficient in Excel (can use functionalities like pivot tables, complex formulas, vlookup, can use macros but not necessarily write macros)

- Programming knowledge NOT required

UiPath Skills help free up employees across departments for more creative and productive tasks.

UiPath Reboot™ Work.

Participate on Social Media using #UiPathSkillathon2022

Role – Systems Engineer
Skills
• 2 years comparable working experience in any of the following areas: SCCM, Bigfix, Sharepoint Bomgar, HPSM, ServiceNow, UiPath, backup & storage solution

Role – Procurement Data Analyst
Skills
•Support the UiPath bot automation to automate manual reports for the Singtel Group

Role – Data Scientist
Skills
• Bachelors or Masters' Degree, preferably in the field of statistics, data science or artificial intelligence.
• At least 6 to 8 years' experience in BI, data visualization, machine learning and AI.
• Solid understanding of Machine Learning and Artificial Intelligence
• Hands-on experience in SQL, Tableau / Power BI, R / Python and UiPath

Role – Associate, Credit Management (Debt Recovery)

Skills
•Work on Tableau, UiPath, Power Automate, Power BI and other software to improve reporting and automation.

Role – Senior Manager

Skills
•Good knowledge in telecommunication and networking (CCNA certification will be an added advantage).
•Good experience with database, data analysis, and automation tool, e.g. UiPath, Python, etc.

UiPath Citizen Developers or Skills are becoming a Life skill for various departments, including IT, Finance & Accounting, HR, Supply chain, Contact Centres, Legal & Compliance and QA/Testing.

==Important Message==

Now that you have completed the UiPath Citizen Developer learning plan, it is time to apply your knowledge.

Our instructor has shared five scenarios and how he has built the solution using StudioX. Please find videos and sample solution files for reference.

We recommend exploring and building the bot based on the instructions provided.

Please record your video of the bot running (give your voice to share step-by-step instructions) on Youtube and title as - ==#UiPathSkillathon2022 Bot Building Exercise==
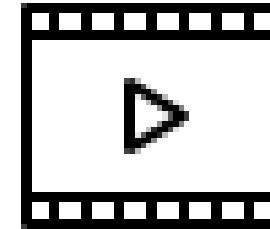

==Please don't limit your creativity to the five examples (recommended) but also try exploring it to real life use cases (things which you may do on a day-to-day basis)==

Sample Bot 1 - Zodiac Sign Finder

Code a Robot in UiPath StudioX to display an individual's sun sign by entering the Date of birth of an individual and produce the output in the message box.

Open the URL("**https://astrologyfutureeye.com/astro-calculators/sun-sign-calculator**") using a Browser Activity

- Enter the 'Date', 'Months' and 'Years' in the drop-down box

- Click on the Calculate button to the zodiac sign details.

- From the details page, fetch the sun sign and display it to the user using a message box.
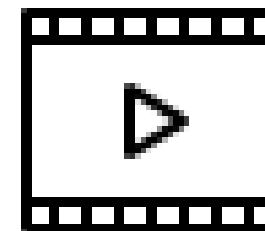

Bot video demo - https://www.youtube.com/watch?v=kyI1VFEiTmw

Sample Solution File
https://drive.google.com/file/d/1vwmYm46hBODX3QnIgJ9YuJdW6KsGZ3ik/preview

Sample Bot 2 - UiPath Careers

Code a Robot in UiPath StudioX that will navigate to the UiPath careers page and export a list of all UiPath careers to an Excel document.

- Open the URL(**"https://careers.uipath.com/careers/jobs"**) using a Browser Activity
- Scrape the **Job Role**, **Location**, and **Categories** from the careers page using Table Extraction functionality.
- Save the scraped data in the **UiPath Jobs Details.xlsx** file present in the project directory.

Building video demo -
https://www.youtube.com/watch?v=Vr02OE0_i9k

Sample Solution File
https://drive.google.com/file/d/1U6HTno0z_WRU4jDaA-AcIR1IBHa-Ei5-/preview

Sample Bot 3 - Participation Certificate

Code a Robot in UiPath StudioX that generates a certificate of participation for all the participants who attended the workshop.

- Read the **CERTIFICATE OF PARTICIPATION.pptx** file to enter the participant's name
- Replace **XYZ** with the participant's name present in the **Participants Details.xlsx** file
- Save the edited certificate file as the participant's name in **PDF** format.
- Repeat the steps for all the participants

Building video demo -
https://www.youtube.com/watch?v=UF54HLR1GyM

Sample Solution File
https://drive.google.com/file/d/11rPTBCxctPu3mOjOzL7HKBIdsPa9Y9tR/view?usp=sharing

Input Files for building the bot
https://drive.google.com/file/d/1bp0_7MkpdY0YRJEV_MHcH9EyYH9oG4IG/view?usp=sharing
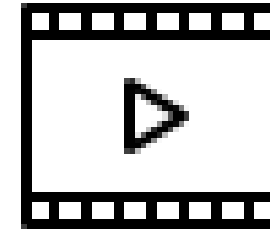

Sample Bot 4 - IMDB Movie Rating
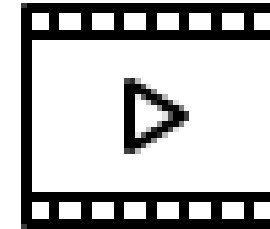

Code a Robot in UiPath StudioX to display the movie rating by entering a movie name and producing the output in the message box.

•Open the URL(**"https://www.imdb.com"**) using a Browser Activity
•Enter the movie name in the search box
•Click on the movie name from the search result to display the movie details page
•From the details page fetch the movie rating and display it to the user using a message box activity.
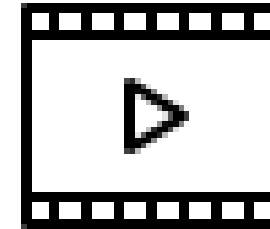

Building video demo -
https://www.youtube.com/watch?v=27waT-T48Mo

Sample Solution File
https://drive.google.com/file/d/1WIU1qsTKuoSIniBe-Q-JCpflzKolvMPK/view?usp=sharing

Sample Bot 5 – RPA Challenge

Code a Robot in UiPath StudioX that input data from a spreadsheet into the form field.

• Download the spreadsheet from https://rpachallenge.com/ by clicking on the **DOWNLOAD EXCEL** button
• Open the URL(**"https://rpachallenge.com/"**) using a Browser Activity
• Using excel activities read the data from the spreadsheet.
• Enter the current row into the corresponding fields named **First Name**, **Last Name**, **Role in Company**, **Company Name**, **Address**, **Email,** and **Phone Number**.
• Click on the **SUBMIT** button once all the data are entered.
• Repeat the process for all the remaining data present in the spreadsheet.

Building video demo -
https://www.youtube.com/watch?v=P1fWey5GwvY&t=395s

Sample Solution File
https://drive.google.com/file/d/1PNJRCcVaB3H8VE2Lb_XX6vV7gXqTzWlw/view?usp=sharing
